CELEBRATE THE 100TH BIRTHDAY OF THE NATIONAL PARK SERVICE!

The national parks have been called “America’s best idea,” and some of the best scientific ideas are happening right now inside these protected places that welcome 270 million plus visitors each year. Meet the wildlife biologists, geysers experts, and other scientists doing research in some of America’s most treasured and scenic places—our national parks.

On August 25, 2016, the National Park Service turns 100! Celebrate by tagging along with the scientists profiled in *Park Scientists: Gila Monsters, Geysers, and Grizzly Bears in America's Own Backyard*, a book for young readers from Houghton Mifflin Harcourt’s prestigious Scientists in the Field series. Readers will

discover grizzly bears and geysers in Yellowstone, the iconic saguaro cacti and venomous Gila monsters in Arizona, and salamander and synchronous fireflies in the Great Smoky Mountains. Readers of all ages will be inspired to visit parks and perhaps participate in citizen science projects.

Nonfiction author Mary Kay Carson and photographer Tom Uhlman live in Cincinnati, Ohio. They are a veteran Scientists in the Field team. Their books include *Emi and the Rhino Scientist*, *The Bat Scientists*, *Inside Biosphere 2: Earth Science Under Glass*, and the soon-to-be-released *Mission to Pluto*. Visit them online at www.marykaycarson.com and www.tomuhlmanphoto.com.

Praise for *Park Scientists*....

“With a conversationist bent, Carson describes just how accessible these real-life 'natural laboratories and living museums' are and how each individual can act with the same spirit of inquiry as the scientist-explorers detailed here.” —*Booklist*

“A well-written, unique, carefully organized treat for nature lovers and investigators.”
—*School Library Journal*, starred review

“Kids anticipating a trip to one of these parks may want to study up now and show off their impressive vocabularies when they arrive.” —*Bulletin*

Park Scientists is a Junior Library Guild selection and was a 2015 Ohioana Book Award finalist.
